Criterion values $\Delta(C_1, C_2)$ over candidate splits $\{C_1, C_2\}$

$C_1 = \{X_i : X_i \leq t\}$ and $C_2 = \{X_i : X_i > t\}$

Legend:
- Δ
- $\widetilde{\Delta}^{\text{grad}}$
- $\widetilde{\Delta}_1^{\text{FPT}} \; \eta = 1$
- $\widetilde{\Delta}_2^{\text{FPT}} \; \eta = 1/\sqrt{2}$

x-axis: Threshold t

y-axis: Criterion value Δ
